BONFITALY Srl

Sustainable Food Packaging

- Bonfitaly develops innovative sustainable single-use food packaging solutions designed for:
 - Retail (GDO)
 - Food Service & Hospitality
 - Events & Catering
 - Food Packaging
 - Pet Food Industry

A new generation of packaging made from food by-products.

Edible
Biodegradable
Natural

Bonfitaly Srl is an innovative Italian start-up developing **edible and biodegradable food packaging**.

The products are made from **plant-based by-products**, such as wheat bran, following the principles of the circular economy.

Bonfitaly combines: • innovation • sustainability • food safety
• research on natural materials

Who is Bonfitaly?

Our goal is to create packaging that generates no waste.

Why single-use packaging needs to change

Single-use packaging is now one of the main sources of waste worldwide.

Millions of plates, containers and food packaging items are used every day in sectors such as:

- restaurants
- retail (large-scale distribution)
- events
- catering

This system generates large amounts of waste, with environmental and economic costs that are becoming increasingly significant for companies and waste management systems.

Many materials considered sustainable, such as bioplastics or compostable packaging, require industrial composting facilities and often create challenges for waste collection and disposal systems.

The food sector needs simpler, more natural and truly circular packaging solutions.

Natural

The Bonfitaly Solution

Bonfitaly introduces a new way of thinking about single-use packaging.

Our tableware is designed to reduce waste and simplify packaging management in the food sector.

A solution designed for:

• restaurants • retail (large-scale distribution) • food companies and food producers • events and festivals • catering

Features:

- ✓ **Edible:** can be consumed together with food.
- ✓ **Biodegradable:** naturally degrades in approximately 30 days.
- ✓ **Plastic-free, glue-free and free from chemical additives**
- ✓ **Suitable for hot food**
- ✓ **Oven and microwave safe**

The result:
Packaging that never becomes waste.
It becomes part of the food experience
or naturally returns to nature.

Bonfitaly Applications

Bonfitaly solutions are used across different sectors of the food supply chain.

1

Restaurants and Food Service

Ideal for: • restaurants • street food • take-away • catering
Natural and durable tableware, also suitable for hot food.

2

Retail (Large-Scale Distribution – GDO)

Innovative solutions for: • fruit and vegetables • ready-to-eat products • deli products • bakery products
Sustainable packaging that enhances product presentation on the shelf.

3

Food Companies

Can be used as natural packaging for food products, **ideal for:**
• snacks • ready-to-eat products • bakery products • sustainable packaging solutions

4

Events and Festivals

A perfect solution for: • festivals • concerts • sporting events • corporate events
Significantly reduces waste generated by single-use packaging.

Benefits for Partners and Businesses

Bonfitaly solutions offer concrete advantages for companies in the food, retail, and events sectors.

- ✓ **Market differentiation:** Innovative packaging that helps products stand out.
- ✓ **Brand value:** Strengthens the company's sustainable image.
- ✓ **Support for ESG goals and sustainability KPIs**
- ✓ **Reduction of waste management and disposal costs**
- ✓ **Sustainable alternative to single-use plastic, bioplastics and paper packaging**
- ✓ **New opportunities for sustainable marketing**
- ✓ **Ideal for restaurants, retail (GDO), events and food companies**

Bonfitaly Product Range

Sustainable single-use solutions for food service and food packaging.

- **Plates**

Available in different sizes: • 16 cm • 20 cm • 24 cm • 28 cm.

Ideal for: restaurants, catering, street food and events.

- **Bowls**

Perfect for: • soups • salads • street food. **Durable and also suitable for hot food.**

- **Cups**

Sustainable single-use cups for cold and hot beverages, ideal for restaurants, events, festivals and food service. *(Product availability may vary depending on stock availability and production.)*

- **Food Containers & Trays**

Innovative solutions for sustainable food packaging, ideal for: • fruit and vegetables • ready-to-eat products • deli products • bakery products *(Product availability may vary depending on stock availability and production.)*

Quality, Safety and Logistics

Storage

To maintain product quality, it is recommended to store the items in clean, dry and well-ventilated environments, protected from moisture and direct sunlight.

When properly stored, the products maintain their integrity and performance until the moment of use.

Durata di conservazione

When stored under the recommended conditions, the products have a shelf life of up to 24 months.

Product Specifications

Maximum moisture: 12%

Colour: Natural colour ranging from yellow-grey to brown

Aroma: Natural aroma similar to bread crust

Allergens

Products are made from cereal bran (possible presence of gluten). Gluten-free solutions are currently under development.

Packaging and Logistics

Products are packed in protective packaging and placed in labelled recycled cardboard boxes to ensure traceability.

The boxes are palletized on standard EUR / EPAL pallets to facilitate transport and distribution.

Custom labelling is available upon request.

Quality and Food Safety

Products are made from plant-based materials suitable for food contact and compliant with European Union regulations.

The management system follows the principles of the ISO 22000 standard.

Laboratory tests indicate material disintegration under simulated composting conditions in less than 30 days.

Certifications and Testing

Products are supported by tests and declarations confirming safety, performance and sustainability, including:

- Food contact suitability
- Oven and microwave use testing
- Environmental analyses (LCA)
- Material safety verification

Certificates and declarations of conformity are available upon request.

Contacts

For information about the product catalogue, pricing and supply options: [✉ info@bonfitaly.com](mailto:info@bonfitaly.com) [☎ +39 377 3513199](tel:+393773513199)

We can provide:

- Product catalogue
- Customized quotations
- Technical documentation
- Support for events and corporate supplies

Support for Businesses and Events

Bonfitaly supports companies, event organizers and commercial partners in selecting the most suitable solutions by providing technical documentation for:

- Public tenders
- B2B projects
- Sustainability reporting
- Regulatory compliance

Products are primarily available for B2B clients, including restaurants, catering companies, event organizers, food companies and distributors.

Innovation & R&D

Innovation is at the core of Bonfitaly's development.

The company works on the development of new sustainable materials for food packaging, using plant-based by-products and natural fibers.

Research activities include:

- development of new edible materials
- solutions for sustainable food packaging
- valorization of agricultural by-products
- new applications for food packaging

Bonfitaly collaborates with **universities, research centers and industrial partners** to develop innovative technologies in the sustainable packaging sector.
