

Pil~light

Pil~light is the new line of Pilates equipment **designed by Pilatech**, a leading company in the field since 1997. After over two decades of innovation and constant research, Pilatech has created a **more essential, elegant, and accessible line** without compromising the high standards of excellence that define the brand. Pil~light was born in response to the demand for equipment with a cleaner, more compact, and versatile design, while preserving the technical identity and aesthetic refinement typical of **Made in Italy**.

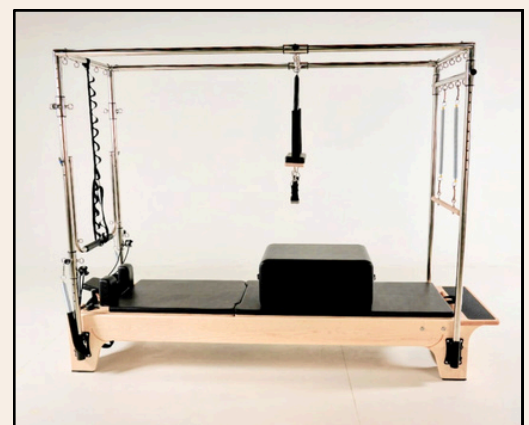

The machines in the **Pil~light** line are made of **natural wood**, carefully selected to ensure durability, visual appeal, and sustainability. This new concept of professional Pilates machines combines **lightness, ease of use, and elegant design**, addressing those who seek a refined tool for training, rehabilitation, and daily wellness.

In addition to their core structure, the machines are designed **to be modular**: the Reformer can be easily integrated with professional accessories such as the **Tower Unit** and **Cadillac** frame, becoming a multifunctional machine that expands the possibilities of bodywork. This versatility allows every studio or professional to personalize the experience, optimizing space and investment.

Pil~light aims to make movement smoother, more harmonious, and intuitive, with products suitable for every setting: Pilates studios, physiotherapy clinics, home environments, and fitness facilities.

Pil~Light Reformer

Essential. Elegant. Versatile.

The **Pil~Light Reformer** is the heart of the new Pil~Light line: a **professional machine** with clean, contemporary lines, designed to offer fluid motion, comfort, and precision.

Entirely crafted in high-quality maple wood, it combines Italian aesthetics and advanced functionality in a compact and harmonious design, ideal for modern and elegant Pilates studios.

Pil~Light Reformer + Tower

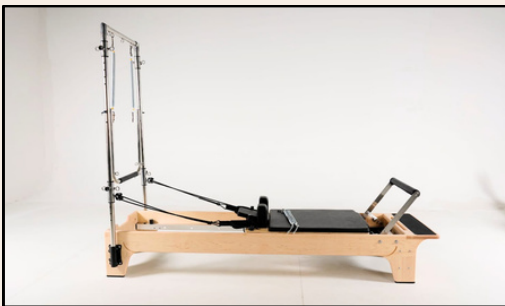

Expanded functionality. Vertical freedom of movement.

The Pil~Light Reformer + Tower (**Pil~Light Reformer Vertical**) is designed to deliver maximum versatility within a single compact and refined machine. The integrated tower extends the range of vertical and resistance exercises, turning the classic Reformer into a **multifunctional station**—ideal for both full-body workouts and rehabilitation work. Perfect for shared spaces or evolving studios.

Key Features

- Tower Unit integrata con struttura in alluminio anodizzato
- Sistema a molle regolabili su binario verticale
- Compatibile con esercizi da Cadillac e Half Trapeze
- Ideale per allenamento in carico verticale e sospensioni
- Ottimizzazione degli spazi senza sacrificare la varietà
- Design coerente e linee pulite
- Tutta la solidità del reformer base, con funzionalità ampliate

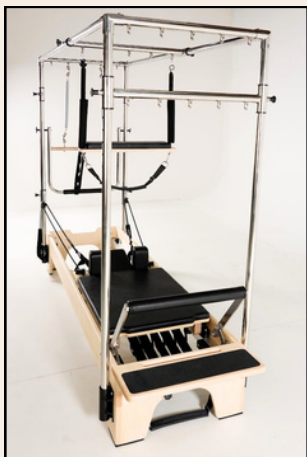

Technical Specs

- Structure: Solid maple wood (custom finish available)
- Size: L 256 cm × W 67 cm × H 190 cm
- Weight: approx. 95 kg
- Tower: detachable anodized aluminum frame
- Push-Through Bar: height adjustable
- Tower springs: 4 springs (2 light, 2 medium) with quick hooks
- Mounting: securely integrated into the reformer base

Pil~Light Reformer Combo

The ultimate Pilates experience in a single structure.

The Pil~Light Reformer Combo is the most complete machine in the line. It combines the features of the classic reformer with the full Cadillac structure, offering **endless exercise possibilities in one compact, solid, and refined solution**.

Perfect for those seeking a single piece of equipment that covers every level of practice: from classical Pilates to advanced training, athletic conditioning, and rehabilitation.

Key Features

- Full integration of Reformer, Tower, and Cadillac frame
- Over 100 exercises in all positions (supine, seated, standing, suspended)
- Stable frame designed for intensive, multifunctional use
- Maximum fluidity of movement thanks to high-quality materials
- Ideal for professional studios, physiotherapy centers, and personal training
